Job Title: Product Owner / Product Manager – Generative AI & Prompt Engineering

Location: Hyderabad
Company: CyePro Solutions
Experience: 3+ Years
Employment Type: Full-time

About CyePro Solutions

CyePro Solutions is an innovation-driven product company based in Hyderabad. We specialize in building smart, scalable, and AI-powered solutions that empower digital transformation across industries. Our mission is to develop intuitive and intelligent platforms using the latest in Generative AI, SaaS, and automation technologies.

Role Overview

We are looking for a highly motivated **Product Owner / Product Manager** with a strong interest in **Generative AI**, **Prompt Engineering**, and a solid grasp of **technical concepts** and **product design** tools like **Figma**. In this role, you will take ownership of developing AI-native products by combining business acumen, product vision, and hands-on collaboration with engineering and design teams.

This is a strategic and execution-heavy role ideal for someone who understands AI product behaviour, UI/UX flows, and agile product development.

Key Responsibilities

- Define the vision and roadmap for AI-powered products, translating ideas into clear deliverables.
- Collaborate with stakeholders to understand business needs and develop user-centric solutions.
- Design and fine-tune prompts for large language models (LLMs) like GPT, Claude, or Gemini.
- Convert requirements into product specs, wireframes, and user stories using tools like **Figma**.
- Work closely with UI/UX designers to review user journeys and ensure intuitive product experiences.

- Collaborate with developers and data scientists to shape technically feasible and scalable features.
- Manage and prioritize the product backlog and lead sprint planning in an Agile environment.
- Conduct user testing and gather feedback to drive continuous improvement.
- Monitor performance of AI features through KPIs like output relevance, latency, and user satisfaction.

Required Skills & Qualifications

- Bachelor's or Master's in Computer Science, Engineering, Business, or a related field.
- 3+ years of experience in product management, business analysis, or related roles.
- Working knowledge of **Figma** and ability to participate in UI/UX design discussions.
- Strong understanding or practical exposure to **LLMs**, Generative AI tools (ChatGPT, Claude, Gemini, etc.), and API integrations.
- Comfortable with **technical concepts**, including understanding developer terminology, APIs, and basic workflows.
- Strong communication and stakeholder management skills.
- Experience with Agile tools like JIRA, Confluence, Notion, or similar.

Preferred (Bonus) Skills

- Familiarity with **OpenAI APIs**, LangChain, vector databases, or similar AI development tools.
- Understanding of **basic programming logic** (e.g., Python, JavaScript) or experience working with development teams.
- Experience with **SaaS**, **B2B**, or enterprise-grade software platforms.
- Exposure to **data visualization**, analytics tools, or performance dashboards.
- Hands-on involvement in UI/UX prototyping or wireframing.
